Towns

Monte Carlo, located in the northern end of the Pinamar district, offers an unparalleled landscape of high dunes. The panoramic view has the attribute of converging between the sea, the forest, and the dunes that extend transversely towards the coast.

Pinamar is the head of the district council. It stands out for its meticulous urban planning with characteristics of a "garden city" and streets that whimsically traverse the undulations of the terrain, giving it aesthetically unique landscapes. It is a thriving city, framed by extensive forests and beaches with modern facilities and services. An ideal place to enjoy outdoor life, sports, artistic, and cultural activities.

Mar de Ostende and Ostende are resort towns that preserve a great historical legacy. Along their beaches, architectural testimonies from the founding years, the early 20th century, can be seen. The scenic viewpoints from the dunes, the tranquil and peaceful atmosphere of its coast, and the wide range of serviced apartments stand out in the landscape.

Valeria del Mar is distinguished by its family atmosphere, its extensive beaches, its acacia forests between dunes covered with tamarisks, and pedestrian walkways with panoramic points towards the sea. In the commercial center, which runs along the main avenue, there are multiple attractions to enjoy, from recreational activities, a wide range of gastronomy, to a picturesque streetmarket.

Cariló is the perfect combination of forest and sea. Its streets traced among the lush vegetation invite you to take walks and hikes. Its shopping promenades offer a variety of proposals ranging from exquisite culinary expressions to design objects and crafts. On the seaside, its hotels and apartments offer a complete range of services, while among the forest, the houses exhibit architecture of multiple designs and styles.
